Reza Khanahmadloo

Data Science Track | Copenhagen

>. TechLabs

2026

Reza Khanahmadloo successfully completed the TechLabs Academy Track **Data Science** with the final project **Job Tracker**.

www.techlabs.org

Track: Data Science

Track-Description:

In the Data Science track the techie learns basic coding skills in Python and then apply them directly to Data Science tasks—from data import to data preparation and visualization to building advanced machine learning models for classification and regression.

Project: Job Tracker

Project Description:

Job Tracker is an AI-driven career guidance platform that helps international talent identify suitable job opportunities and navigate the Danish job market. By analyzing user skills, experience, and career goals, the platform provides personalized job recommendations, skill gap analysis, and tailored roadmaps to improve employability and career success.
